**Subject:** [External] Dominion Energy Net Metering Tariff Proposal

Ladies & Gentlemen,

We urge you to **reject the latest proposal by Dominion Energy to attach outrageous monthly fees to customers with solar panels and almost eliminate the compensation for exported energy.** Even though we do not live in the Dominion territory, we are deeply concerned about the effect on climate change as well as the solar industry. We must fear that this trend would encourage other suppliers, like Santee Cooper and our Berkeley Electric Coop, to follow suit.

We have just installed a 5.78 KW solar array with net metering which, at the current tariff of our supplier, is already a money loser. We believe that allowing this change, **or any portion of it**, would be a dereliction of duty and raise the question of undue influence by a powerful nationwide utility corporation.

We will appreciate to learn your reaction to this objections and similar ones.

Reinhold & Virginia Roedig

Wadmalaw Island, SC
